A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Status of Claims

2. Claim 289 is currently amended.
3. Claims 290-300, 308-312, 319-321, and 327-330 are previously presented.
4. Claims 289-300, 308-312, 319-321, and 327-330 are currently pending.

Response to Applicant's Arguments

5. Applicant's arguments, see page 2, filed 6/3/2009, with respect to claim 290, being rejected under 35 U.S.C. 112nd Paragraph have been fully considered and are persuasive. The rejection of claim 290 has been withdrawn.

Art Unit: 3693

6. Applicant's arguments on pages 2-3, with respect to claims 289-300, 308-312, 319-321, and 327-330 has been found persuasive. The 35 U.S.C. 102(e) rejection has been withdrawn.

7. Applicant's arguments filed 6/3/2009 have been fully considered but they are not persuasive. Applicant argues "The claimed methods clearly transform underlying subject matter, i.e. the size and specification of power generating equipment...and/or the transmission facilities for the electric power between the energy service provider and the customer. Examiner disagrees. Applicant claims, "a proposed electric power transaction.....which includes modeling...electric load with electric power supply obligation, and determining an effect upon the energy service provider's efficiency." In order for In order for a method to be considered a "process" under §101, a claimed process must either: (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials). *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972). If neither of these requirements is met by the claim, the method is not a patent eligible process under §101 and is non-statutory subject matter. Here applicant is simply modeling the effects of combining electric loads. There is no physical transformation as applicant claims.

Claim Rejections- 35 U.S.C. 101

8. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 289-300, 308-312, and 327-330 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In order for a method to be considered a "process" under §101, a claimed process must either: (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials). *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972). If neither of these requirements is met by the claim, the method is not a patent eligible process under §101 and is non-statutory subject matter.

Allowable Claims

9. Claims 289-300, 308-312, 319-321, and 327-330 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101 as set forth in this Office action.
